

COILCARE ENERGY

Powering Efficiency, Preserving Energy

Effortlessly clean HVAC coils, save energy and reduce maintenance costs

Unleash the power of efficiency with COILCARE® ENERGY. Placed strategically in front of cooling coils, it automates the cleaning process, reducing biofilm and making your AHU more energy-efficient.

Experience peak performance and lower energy costs. COILCARE® ENERGY is less expensive and more effective than manual cleaning, not to mention it eliminates machine downtime!

Benefits of Coilcare Energy:

- **Energy Savings:** Achieve up to 24% reduction in energy consumption by ensuring the system works at optimal levels, potentially cutting HVAC energy costs by up to 30%.
- **Reduced Maintenance:** Automatic, continuous cleaning of cooling coils decreases the need for manual maintenance, saving time and reducing labor costs.
Extended System Lifespan: Increased lifespan for fans, pumps, and cooling systems due to reduced strain and improved performance.
- **Optimized Performance:** Enhanced thermal efficiency of cooling coils, leading to improved heat transfer and lower energy consumption.
- **Cost-Effective:** Less expensive and more effective than regular manual cleaning, with a return on investment achieved quickly.
complexes.
- **Improved Wellbeing:** Enhanced cooling coil hygiene contributes to improved air quality and overall occupant health.

Harnessing Nature's Cleaning Power

COILCARE ENERGY - TRIED, TRUSTED, TRANSFORMATIVE

Coilcare is a pioneering solution for energy efficiency in hotels, shopping centres and large scale buildings all around the world
